

Unit 4 – Python programming

Topics learnt:

1. Program maintainability
2. Testing

Term 3

Topics learnt:

1. Advanced programming techniques
2. Boolean logic
3. Data representation

Term 1

Topics learnt:

1. Integrated development environments
2. Ethical legal and cultural impacts of computer science
3. Operating systems
4. Utility software

Term 2

Topics learnt:

1. Wired and wireless networks
2. Programming languages
3. Programming fundamentals and data types
